U: In the base of L, 4 hours lighting. Then 100% lighting when there is person passing by; stop lighting when the person go away.

[Contact us for more details and price](#)

*The solar charge controller is very easy to be broken. Most factory use \$1-\$2 controllers. We use \$8 controller to make sure a very low broken rate.

*Most factory use Grade B / C battery without the protection board. We use \$5 Grade A lifepo4 lithium battery to make sure real 3 years warranty, 6-7 years life.

* We are very care about the long time business. So we will take the responsibility of the warranty that we promised. PS: Any broken parts in warranty time, we will send the new parts. (Not the whole products, but the material parts such as solar panel, battery, charge controller.)
